Mumbai, India ♦ +91 7841989060 | kanojiyan107@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Flutter Developer with **1.5+ years of experience** designing and shipping enterprise-grade, high-performance mobile applications using **Flutter** and **Dart**. Specialized in **Clean Architecture**, **MVVM**, and robust **offline-first architectures** with automated data and media synchronization pipelines. Deep expertise in client-side caching with **Hive** and **SQLite**, custom networking with **Dio** and automated failover interceptors, device-level security verification, and hardware integrations. Adept at identifying and fixing memory leaks, Android lifecycle crashes, and field edge cases using **Firebase Crashlytics**.

TECHNICAL SKILLS

Languages & Frameworks	Dart, Flutter
Architecture	Clean Architecture, Feature-First Architecture, MVVM, Repository Pattern
State Management	Riverpod, StateNotifier, Provider
Dependency Injection	GetIt
Networking	Dio, REST APIs, JSON Serialization, JWT, Interceptors, Server Failover
Local Storage	Hive, SQLite, SharedPreferences
Cloud & Firebase	Firebase Authentication, Firebase Crashlytics
Hardware / APIs	Geolocator, Google Maps, Mobile Scanner (QR), Device Info Plus
Media Processing	Image Picker, Image Compression, Video Processing, File Handling
Developer Tools	Git, Android Studio, Connectivity Plus, Dartz, flutter_dotenv

EXPERIENCE

Software Development Executive <i>Can Image Media Tech</i>	April 2025 – Present <i>Mumbai, India</i>
--	--

- **Develop and maintain** production-scale **Flutter** applications serving daily enterprise field operations, workforce management, and automated verification pipelines.
- **Architect centralized networking** using **Dio** with automated request/response interceptors, centralized token injection, structured error mapping, and resilient JSON processing.
- **Implement offline-first workflows** backed by **Hive** and **SQLite**, allowing uninterrupted survey and task logging with scheduled background sync upon network reconnection.
- **Integrate core device hardware** including custom camera modules, client-side **image compression**, real-time **GPS tracking**, QR barcode scanning, and dynamic Android runtime permissions.
- **Investigate production anomalies** and crash events using **Firebase Crashlytics** and structured remote logging, achieving near-zero sync loss across unstable field networks.
- **Optimize Android runtime performance** by managing memory usage, camera preview lifecycles, background execution constraints, and state persistence.
- **Collaborate with backend teams** to design and refine API specifications, contract schemas, and secure token authentication lifecycles.

PROJECTS

School Infrastructure Survey & Execution Platform – CanImage

Flutter

Enterprise Solution

Field Operations

- **Architected complete multi-stage inspection workflows** covering Pre-Recce, Execution, and Post-Recce phases for nationwide school infrastructure surveys.
- **Engineered offline-first local persistence** utilizing **Hive** and **Riverpod**, ensuring complete data consistency and zero data loss in remote areas with zero network connectivity.
- **Developed custom canvas measurement tools** for real-time wall dimensioning, automated **Sq.ft calculation**, and vector annotation using **RenderRepaintBoundary**.
- **Engineered an automated DXF generation engine** to transform captured wall coordinates and geometric markers into CAD-compatible files for engineering design teams.
- **Integrated automated image compression pipelines** to reduce payload sizes before dispatch, significantly minimizing upload failures over slow cellular networks.

Tech Stack: Flutter, Dart, Clean Architecture, **Riverpod**, **Hive**, **Dio**, **GetIt**, Geolocator, Firebase Crashlytics

Paster Register & Workforce Management App

Flutter

Enterprise Solution

Workforce Solutions

- **Delivered a multi-role enterprise application** managing vendor registration, applicator onboarding, workforce hierarchical associations, and multi-level approval stages.
- **Structured scalable codebase** following **Clean Architecture** and the **Repository Pattern**, decoupling UI from business logic using **GetIt** and **Riverpod/StateNotifier**.
- **Engineered persistent multi-step forms** utilizing **Hive**, allowing field personnel to exit and resume complex multi-stage registration flows without losing filled state.
- **Hardened API security** using centralized **Dio** interceptors, functional error boundaries via **Dartz**, **Firebase Authentication**, and hardware device-linked verification.
- **Integrated Google Maps and Geolocator APIs** to log technician work sites and trace location check-ins during on-ground shifts.

Tech Stack: Flutter, Dart, Riverpod, Hive, Dio, **Firebase Auth**, Google Maps, **Geolocator**, Dartz

CIMT-App – Enterprise Field Execution & Monitoring Platform

Flutter

Enterprise Solution

Field Monitoring

- **Spearheaded development** of an enterprise tracking platform executing real-time checkpoint validation, geo-fenced activity execution, and multi-stage photo proofing.
- **Engineered an offline synchronization engine** using **Hive**, **Riverpod**, and **Connectivity Plus** that prioritizes and queues network requests during offline states.
- **Built an automated server failover system** inside custom **Dio** interceptors that dynamically switches between primary and secondary server nodes when encountering timeouts.
- **Implemented strict SecurityGuard checks** detecting mock locations, developer mode toggles, emulator execution, and device rooting to safeguard enterprise data integrity.

Tech Stack: Flutter, Dart, Riverpod, Hive, Dio, **JWT**, **Connectivity Plus**, **Firebase Crashlytics**

EDUCATION

Bachelor of Science in Information Technology

University of Mumbai, Maharashtra, India

June 2021 – April 2024

CGPA: 7.81
